Notes:

^a Only those counties with present or past nonattainment designations are listed in this table. All other counties included in the study area are either in attainment or unclassifiable. These counties include Bartholomew, Hancock, and Randolph counties in Indiana, and Darke and Shelby counties in Ohio.

^b The 1997 8-hour ozone standard was revoked on July 20, 2013. Therefore, updated maintenance plans are no longer required.

^c Counties with a partial nonattainment status have certain boundary areas defined within the county lines for the pollutant of concern.
